Designer Genes Technologies, Inc. & ILIA CUP Lab

Beef Cattle Ultrasound Training
September 7th - 9th, 2014
Designer Genes Technologies Training & Technology Center
Harrison, Arkansas

Who Should Attend
Persons wishing to learn more about UGC approved BIA (Beef Image Analysis Software), and the International Livestock Image Analysis centralized processing lab and people wanting to have a refresher before attending the 2014 UGC Certification process.

This course is designed for all ranchers or technicians certified or not to learn more about the new software and proper scanning techniques for collection of the 12th -13th rib fat thickness, ribeye area, percent intramuscular fat and rumpfat. Attendees will be presented information necessary for participation in the UGC Proficiency Testing process to be held at a later date in 2014. Additionally, participants will be trained to use the UGC approved Beef Image Analysis (BIA) software for collection of images necessary for the centralized ultrasound processing laboratory of International Livestock Image Analysis Lab (ILIA).

Cost
$600.00 per person for the Beef Cattle Ultrasound Short Course payable in advance. This class is limited to 10 people.
